# INTRODUCTORY.

In presenting this New Edition of our complete Illustrated Catalogue to our friends and patrons, we wish to express our appreciation of and gratitude for continued generous business favors.

We would also respectfully direct attention to large additions to our line of bottles and to a change in the list prices of some articles and sizes in order to make our listed prices conform with those adopted by the Eastern and Western Flint Bottle Manufacturers, Nov. 18th, 1903.

This Catalogue supersedes all previous issues, and is hereby respectfully commended to all Bottle Buyers in the hope that its pages may prove helpful.

*ILLINOIS GLASS CO.*

## ***Subject Matter:***

Of necessity, only bottles of common use and design are shown in a Catalogue of this kind, all special and proprietary designs belonging to our customers. The volume of our sales on Private Mould bottles, designed and used for special needs, largely exceeds that on stock ware. Were the object of this book simply to make it original and to advertise the extent of our business, it would present a very different appearance. Under the caption of "Moulds for Special Shapes," page 20, we have tried in brief to offer a few suggestions to users of special bottles, which we trust may be of value.

## ***Illustrations:***

Special effort has been made to truthfully show the actual lines and proportions of each and every object for illustration, all cuts being prepared by photographic methods. Each and every picture may thus be depended upon to show the actual appearance of its original. We hope they may be serviceable to buyers in the selection and sale of bottles.

# CONTENTS

	PAGE.
PART I. Introductory, Index, Tables, Discounts, etc .....	3
PART II. Flint Glassware and Miscellaneous Articles .....	22
PART III. Shop Furniture, Glass Labels and Drawer Pulls.....	81

## DISCOUNT.

Where prices are shown in this Catalogue they are subject to our trade discounts, which, of necessity, are liable to variation. We cannot undertake to notify the trade of changes, and guarantee no prices beyond the immediate present.

## TERMS.

Payments are expected in all cases in funds equal in value to United States Treasury Notes or Exchange on St. Louis or Chicago.

First orders from parties with whom we have no acquaintance should be accompanied with cash or satisfactory reference.

Our regular terms are 30 days, or 1 per cent discount for cash within ten days from date of Invoice.

## SHIPMENTS.

Where customers have no preference, the choice of route can safely be left to us.

Our commanding geographical situation and matchless shipping facilities enable us to secure the lowest possible freight rates obtainable for our patrons, whether by rail or water.

## ALLOWANCES.

All our goods are packed by workmen of long experience and are loaded by our own skilled men; hence we make no allowances for breakage, our Bills of Lading being guarantee of good order when shipped. Claims for packages lost, overcharges in freight, or excessive breakage, should be made on transportation companies immediately on discovery.

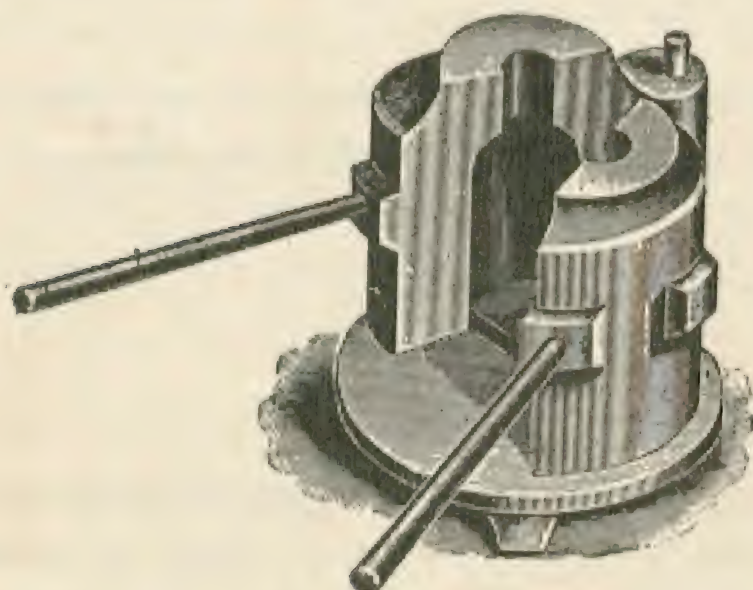

## MOULDS FOR SPECIAL SHAPES.

Many Bottle users prefer shapes and designs of their own. For all such we are thoroughly equipped in our own extensive Machine Shop to make at short notice moulds for any practicable bottle, and at the lowest possible cost for first-class work. In ordering a special shape, an exact model of same should be furnished. In cases where this is impracticable, our own artist will produce a wooden model of the desired bottle if furnished with the idea by a drawing or otherwise. If we make the moulds no expense will attach for models; otherwise a charge for the actual cost of producing same will be necessary.

Special Moulds should always be in pairs for each size and shape, for **economy's** sake. Where large quantities of bottles are desired this is **indispensable**. Better and more uniform bottles are always secured when moulds are worked in pairs.

The cut herewith shows a mould for an oval prescription bottle. The mould is made of the best grade of gray cast iron and weighs about 80 lbs

## THE ANNUAL SUMMER SHUT-DOWN

Is of the greatest interest to users of private mould bottles. All such should *always* have their orders placed before May 1st for enough ware to carry on their business from July to October. Nearly all glass factories close from July 1st to about Sept. 1st, on account of the summer heat and for needed repairs of furnaces. Thousands of dollars are lost every summer by those who have failed to properly anticipate their needs for special ware.

### FINISH.

The ordinary varieties of finish for bottles are given below, which, with slight modifications or combinations of two or more styles, will meet almost every requirement.

Prescription Lip.

Extract Lip.

Packer Lip.

Flare Mouth

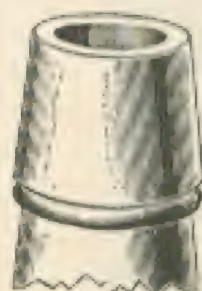

Oil Finish.

Double Ring.

Bead Finish.

Brandy Finish.

## PART II.

## FLINT GLASS BOTTLES AND WARE.

**U**NDER this caption is included a wide range of ware which we will not try to catalogue here, but rather refer the reader to the pages immediately following, which we hope explain themselves.

Pre-eminence has been our constant aim both in **quantity and quality**, and we wish here to assure our kind business friends, through whose gratefully appreciated assistance we have been able to attain our present position, that the same zealous care will be taken in the future as in all the past to produce and always **furnish full value flint ware**.

Special attention is again directed to a **change in the listed prices** of Flint Bottles in order that our list may conform with that adopted by the Eastern and Western Flint Bottle Manufacturers, Nov. 18th, 1903.

In order to reduce the **weight** of a box of bottles to the minimum, save as many as possible from breaking in carriage, exclude dirt, save time, and preserve temper, we now pack all Prescription Bottles in Paper Packing, unless otherwise specified.

## FLINT GLASS BOTTLE LIST.

## SUN OVALS.

NAME AND TRADE MARK REGISTERED.

Always packed in paper unless otherwise ordered.

## PART III.

## SHOP FURNITURE.

**W**E present to the trade our four styles of Shop Ware and Glass Labels for same. The cuts on the following pages show the characteristics of the ware with faithfulness, so far as plain black and white is able to represent transparency and brightness. We believe that, quality considered, we produce the handsomest and best Sets of Shop Furniture on the market for a moderate cost.

We lay special stress upon promptness in this department of manufacture, and can safely guarantee any ordinary set of ware within one week after receipt of order, complete with the glass labels. This naturally leads us to the subject of

## GLASS LABELS FOR SHOP FURNITURE.

On the preceding pages will be found lithographs of twenty or our best selling Hand-Painted Glass Labels, as a guide in selection. In ordering, kindly use the printed numbers, noting any change desired. If desired label does not appear, reference by number and name to any other list will suffice. Where something entirely unique is desired, a sample label, or drawing, with color indicated, can be furnished and we will paint a sample label for approval. In all cases where *labels only* are wanted, if for round bottles, the exact circumference of same where the label is to be applied, must be given; while if for any other shape, a sample bottle should be furnished.

Unless especially ordered, we use only the very best Lead Glass Labels, of full size and with ground edges. Only the best colors are used in painting, and Immaculate Labels are invariably backed with two coats of zinc-white, thus securing white labels that *stay white*.

Under protest, we *can* make cheaper labels to meet competition, which will be just as good and handsome as anybody's labels of the same grade and price.

## PRICES OF STANDARD LABELS.

Nos. 0, 1, 21, 51, and 113,	- - - - -	13 cents each attached.
" 2, 7, 11, 84 and 201,	- - - - -	14 " " "

## GREEN GLASS BOTTLES.

## PART V.

Here will be found many of those bottles usually made in Green and Amber Glass that are used by *Manufacturing Chemists, Compounders of Proprietary Remedies, Ixcs, Mucilage, Bluing, Shoe Polish*, and the like. It is of course understood that a very large portion of such ware is made in *Private Moulds*, differing in some respects from Stock designs as shown in this Catalogue. All such shapes are the property of our customers and cannot be shown here.

Special energy has been concentrated upon the requirements of this branch, and the fact that this is one of the most extensive departments of our business would seem to indicate that our efforts had not been altogether unappreciated.

We invite special notice to pages 107 to 116 on Carboys and other large size Safe Carriers, and Solicit correspondence.

## PART VI.

## SHOW PACKAGES AND SAFE CARRIERS.

## SHOW YOUR GOODS IF YOU WANT TO SELL THEM.

The Triplicate Show Case (shown above) is 34 inches long, 14 inches wide and 16 inches high, carries *three* clear Flint Glass Jars of  $3\frac{1}{2}$  gallons capacity. Price, f. o. b. cars, \$6.00 each, complete with jars.

The Duplicate is 24 inches long, 14 inches wide and 16 inches high, carries *two* of the  $3\frac{1}{2}$  gallon clear Flint Jars.

Price, f. o. b. cars, \$4.50 each, complete with jars.

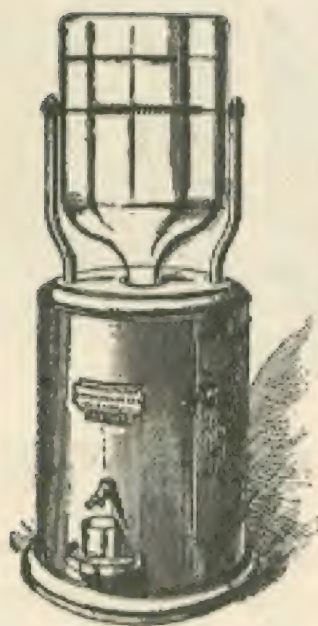

The Independent is 14 inches square, 16 inches in height, and carries *one*  $3\frac{1}{2}$  gallon clear Flint Jar. Price, f. o. b. cars, \$3.00 each, complete with jar.

Larger sizes can be furnished where desirable, at corresponding prices, same style as above, or finer finish if required.

Regular cases, as above listed, are substantially made of Oak, handsomely finished with screen ventilation openings and glazed with the best double strength glass.

A DISCOUNT CAN BE MADE ON THESE GOODS ON JOBBING ORDERS.

**SPECIALTIES.****HYGIENIC WATER COOLER.****THE ACME OF PERFECTION.**

This excellent and economical Water Cooler was one of the salient features of the great World's Fair in St. Louis, and will be remembered by all who visited the Fair.

We are prepared to execute orders promptly for the Coolers complete with the 5-Gallon Reservoir Bottle, as per cut.

Correspondence is solicited.

Net prices only on application.

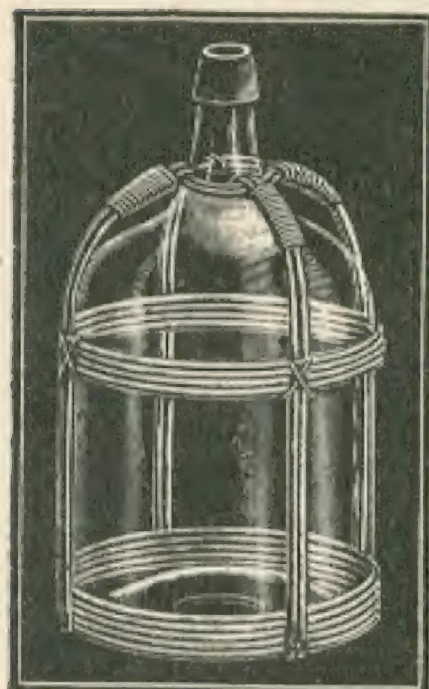

## SPECIALTIES.

## SKELETON DEMIJOHN.

For Laboratory Work or Spring Water Distribution.

A new container of high merit. Bottles are of *clear, light green glass*, affording opportunity for minute and intelligent inspection of contents. The protection against breakage at the bottom is perfect, while the four upright canes or standards afford security for the sides and serve as substantial handles. For the display and distribution of spring waters or intelligent laboratory work this package has no equal.

Skeleton Demijohn.

## SIZES AND PRICES.

2 gallon	40c each.
3 "	65c "
5 "	80c "

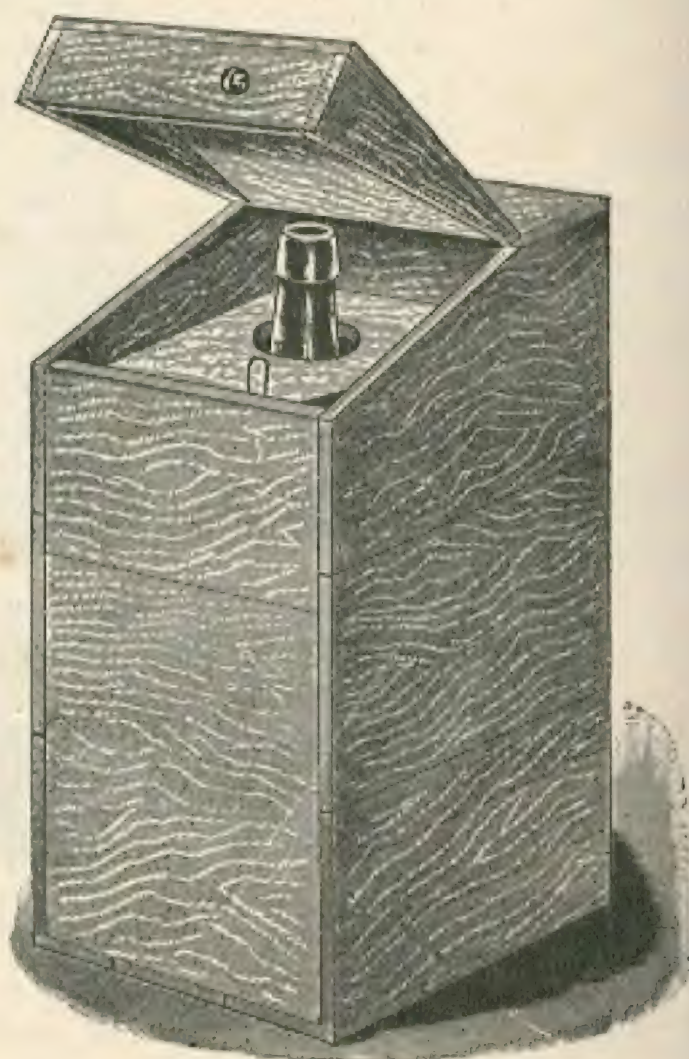

### OUR IMPROVED SAFE CARRIER.

One of the Safest, Neatest and most Compact Glass Carriers and Containers made.

## SIZES AND PRICES.

	Naked Bottles.	Wickered Bottles.	
1 gallon cap	\$0 45	\$0 50	each.
2 "	60	75	"
3 "	85	1 00	"
5 "	1 10	1 25	"

Naked or Wickered Bottles may be used in making up this package, at the option of buyer.

## HIGHAM ROCKER LID DEMIJOHN AND CARBOY BOX.

Regular stock carried without lettering. Special Orders can be printed as desired.

Above cut shows the **HIGHAM ROCKER LID DEMIJOHN AND CARBOY BOX**. The Round Top cover, as will be noted by reference to the cut, serves three distinct and useful purposes.

**AS A COVER**, it affords safety in shipment and storage.

**IT PERMITS FULL EXPOSURE** of bottle and contents when filling, preventing accident and loss of material.

**AS A ROCKER BOTTOM**, it allows contents to be emptied slowly or quickly, and without waste.

Built for service, strongly ironed, with bottles carefully insulated against breakage, this carrier is matchless for the safe shipment and storage of Acids, Liquors, Waters, Extracts, or Liquids of any kind.

For Acids and other Corrosive Liquids, bottles can be furnished with a new patent stopper, which is easily applied, neat and effective, without great expense.

## NET PRICES.

1 Gallon capacity, complete with bottle,	\$0 50 each.
2 "	75 "
3 "	1 00 "
5 "	1 25 "
10 "	1 75 "

Customers' Names printed on Rocker Lids free in lots of 100 of each size.

Naked Carboy Showing Columbian Stopper attached

The above sizes are regular stock and can be furnished promptly on receipt of order.

Special sizes furnished where required.

Net prices on inquiry.

The Carboy business is not an experiment with us, and we confidently invite inquiry from the largest and most exacting buyers.

### CLAY STOPPERS.

We carry in stock the regular glazed Clay Stopper for Carboys, at \$6 00 per thousand.

## SPECIALTIES.

### CARBOYS, NAKED OR BOXED.

Regular or Special Finish.

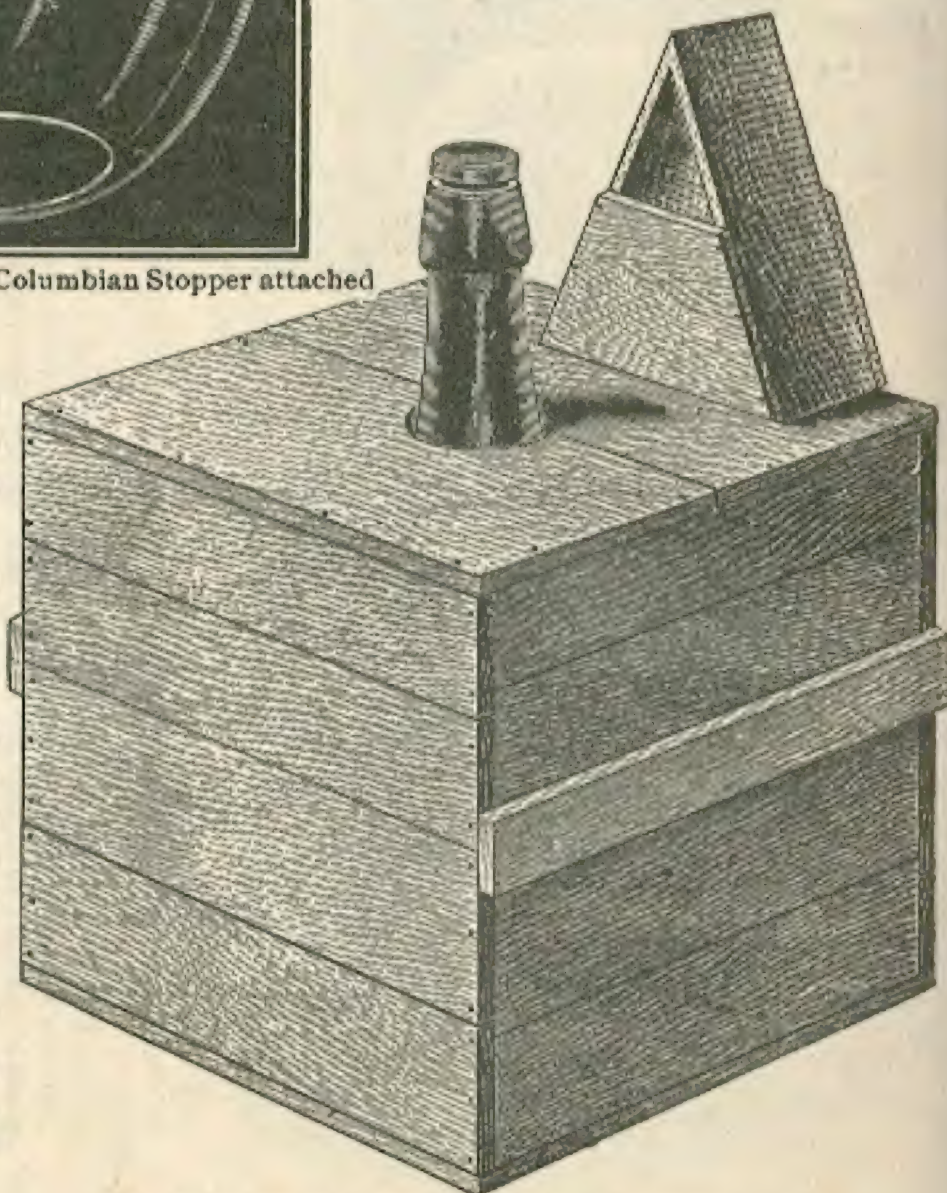

The following sizes are regular stock.

10, 12, 13, 14 and 15 gallon.

*Net prices only can be made on Carboys.*

Ground Glass Stopper Carboys cost about 50c each more than plain.

For Non-Corrosive contents, Columbian Glass Stoppers and Rubber Gaskets are convenient and effective, costing only about 25c each more than plain Carboys.

Boxed Carboy with Ground Glass Stopper and Hood.

## SPECIALTIES.

## RUBBER TIRED CARRIAGE.

For the safe carriage of Waters, Oils, Liquors, or other Liquids  
to regular customers.

## THE KAMMERER PATENT CRATE

as shown has many advantages. It is

SAFE, CLEAN, STRONG, LIGHT, CHEAP.

5-Gallon, complete.....80c each.

Crates, only.....45c "

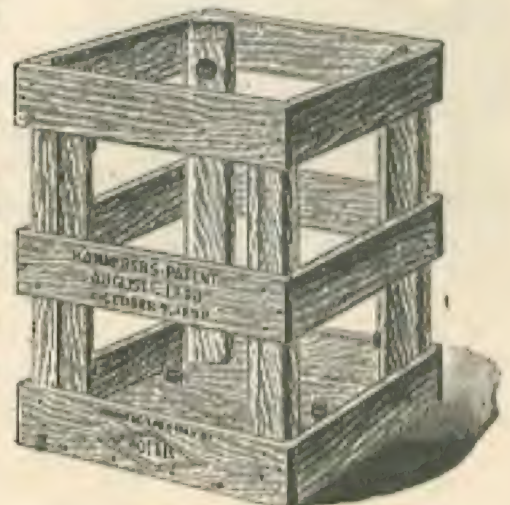

The five-gallon size only carried in stock. The two and three gallon sizes can be furnished on special orders in large quantities at net prices on inquiry.

See page 273 for Special Patent Stoppers for Large Bottles.

## CUSHIONED CRATES.

Cut shows the Kammerer Rubber Cushioned Crate without the bottle, thus illustrating more effectively its simplicity, strength and thorough protection of the glass from external violence. Bottle rests on Rubber Cushions, both bottom and sides. Having secured from the patentee the right to make and sell this valuable contrivance, we are prepared to quote bottom prices with prompt delivery.

Correspondence Solicited.

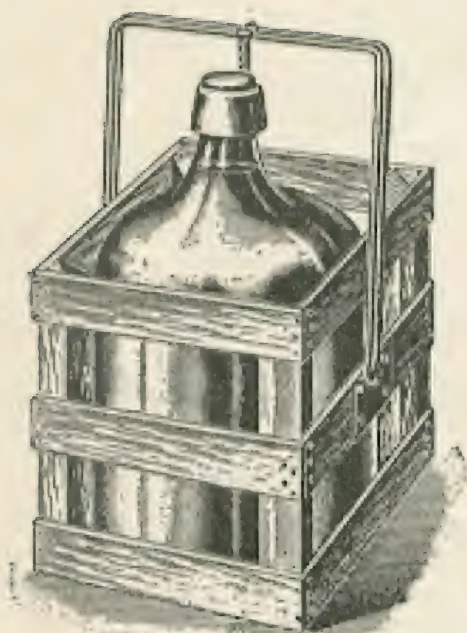

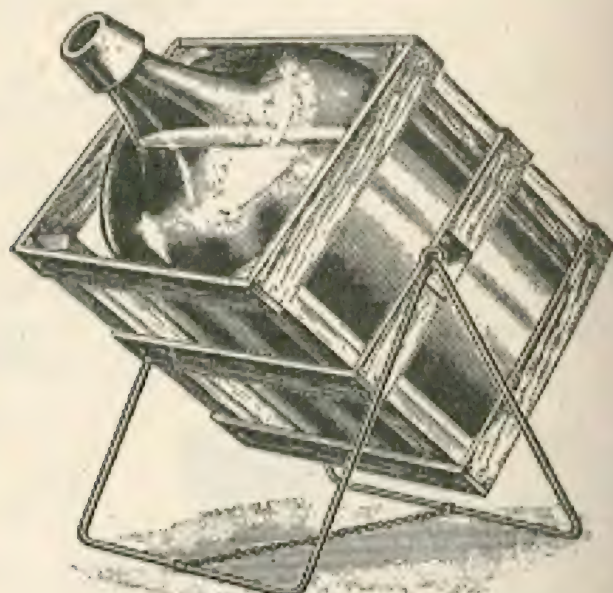

## SPECIALTIES.

## THE BROWN-WINSTANLEY TILTING DEVICES.

(Patent applied for.)

As a Handle.

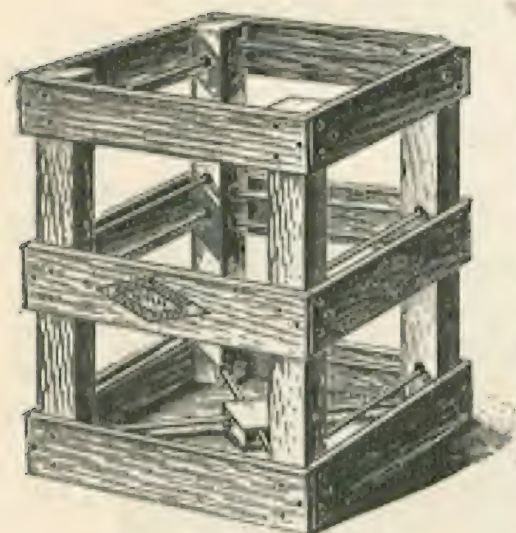

Adjusted for Pouring.

The engraving shows TILTING DEVICE applied to an Alton Water Crate.

Price, 75c Each.

Correspondence Solicited.

## THE ALTON WATER CRATE.

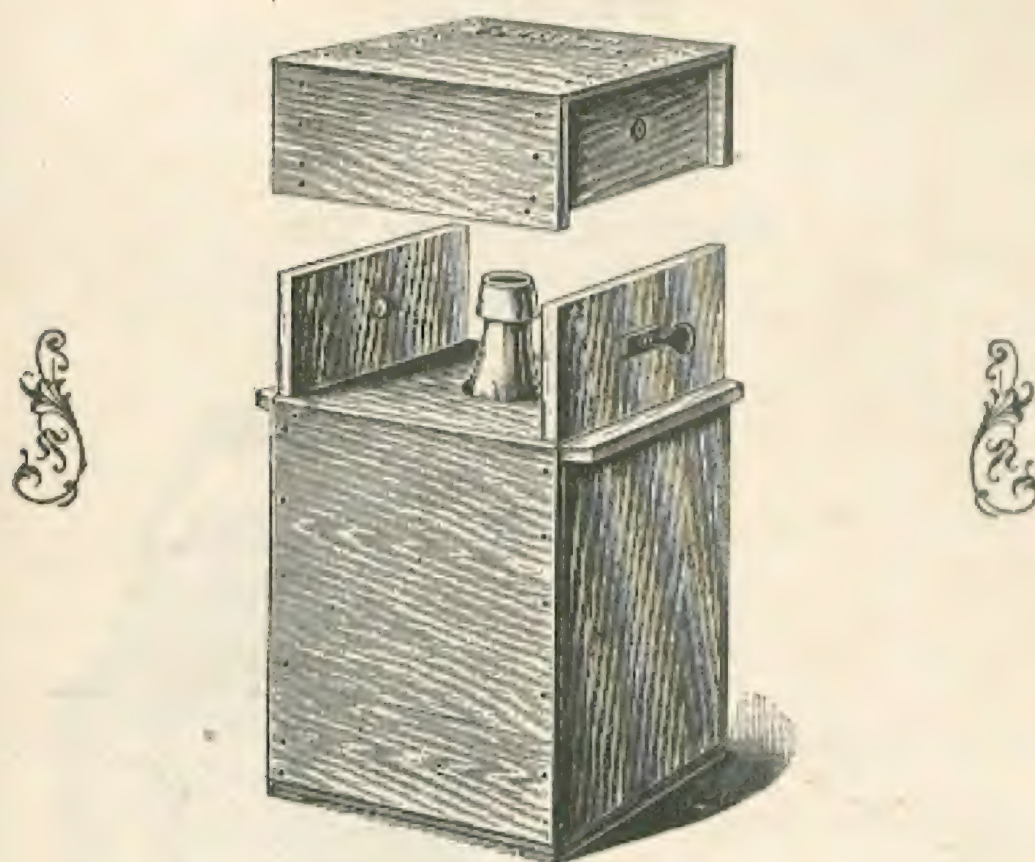

For the local delivery of Water, Oils, Liquors and other Liquids.

5-gal. capacity, complete with glass..... 80c each  
Crates only, as shown above..... 45c each

The new construction on this Crate deserves careful note. It is *effective, strong, light, cheap and safe*. Hickory Dowels at all points of contact between bottle and crate afford a permanent and effectual cushion and spring for the safe carriage of the bottle.

## SPECIALTIES.

## THE CALIFORNIA BOX DEMIJOHN.

## SIZES AND PRICES.

1-gallon capacity.....	\$0 50 each.
2 " " .....	75 "
3 " " .....	1 00 "
5 " " .....	1 25 "

The cut shows this new container opened, with the lid above in position to slide down into place for closure. When the cover is down and the thumb screws tightened, it forms, with the body of the California Box Demi-John, a solid rectangular package, which gives perfect protection against breakage, both to the body and neck of the glass bottle, while it also meets all conditions for safe and economical piling, both in shipment and storage.

For the economical movement and storage of Mineral Waters, Oils, Extracts, Acids, Liquors and other Fluids, this new package has marked advantages.

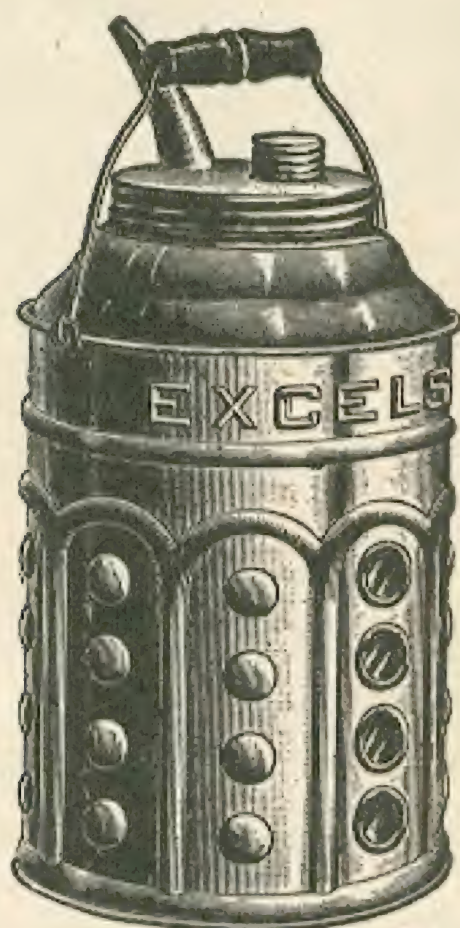

## SPECIALTIES.

## EXCELSIOR GLASS OIL CAN.

Shows the Valve.

One Gallon Size only.

Net prices on application.

The numerous advantages of a Glass Container for kerosene hardly need to be mentioned. Neatness, cleanliness, permanence, the ability to see how much oil the can contains and the ease with which the can may be filled and emptied, are the "*paramount issues*." In comparison with an ordinary tin can, there simply *is* no comparison.

The Excelsior is fitted with a marble valve spout in place of the ordinary cap and chain. This really prevents evaporation and smell because it always acts automatically and is never lost or out of place like other Spout Stoppers.

## ILLUSTRATED CATALOGUE.

## PART VII.

---

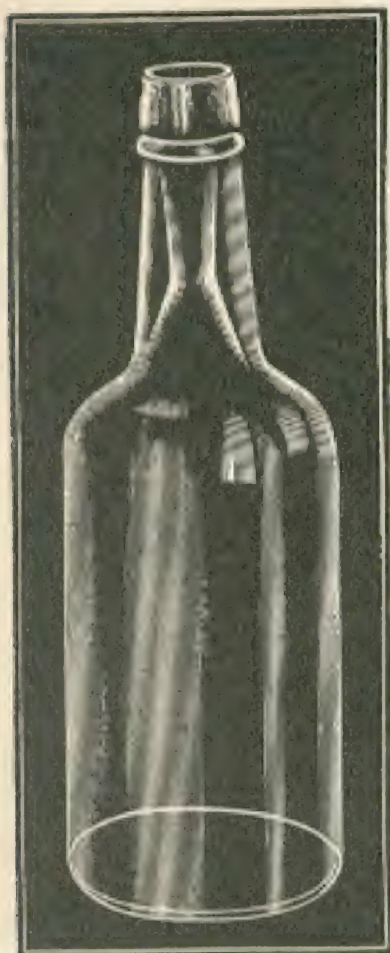

The following pages are devoted to that class of bottles which are distinctively used for Liquors in their almost infinite variety and detail.

We are almost disposed to apologize for the profusion of designs in this department, tending somewhat to confusion, and will here state in way of explanation that every design has been tested and proved desirable, all superfluous styles having been dropped.

This branch of the business requires more than usual care in the selection of materials and skilled and careful blowers, annealers and packers. Our efforts in this direction have been very generously appreciated by some of the largest trade. We now commend this portion of our Catalogue to the Wholesale Liquor Trade in the sincere hope that its pages may prove useful both in the selection of Bottles and Cases for same.

## LIQUOR BOTTLES.

No 232—Paste Mould.

Fancy Choke Neck.

No. 233.—Paste Mould.

Baltimore.

This Family Group of *Wickered Bottles* is given so that buyers may see at a glance the variety of such goods made, as well as to offer a suggestion as to the elaboration of designs possible in this branch of the trade. In order that the actual proportions of its members may be appreciated, it is only necessary to say that the central figure marked No. 1 is 6 feet high.

The following index by numbers will serve to identify the numbers of the group if one is not familiar with their features:

1	Show Demijohn, Dummy.	27	5 to Gal. Straight Open Shoulder S. Cap.
2	Tall Quart Wickered Bottle	28	4 " " " " "
3	" 5 to Gal. " "	29	4 " " Concave S. Cap, open shoulder.
4	" 6 " " "	30	Pint Onatoga " "

Any of the flasks quoted on this page can be made in Green or Amber Glass at special net prices on order only.

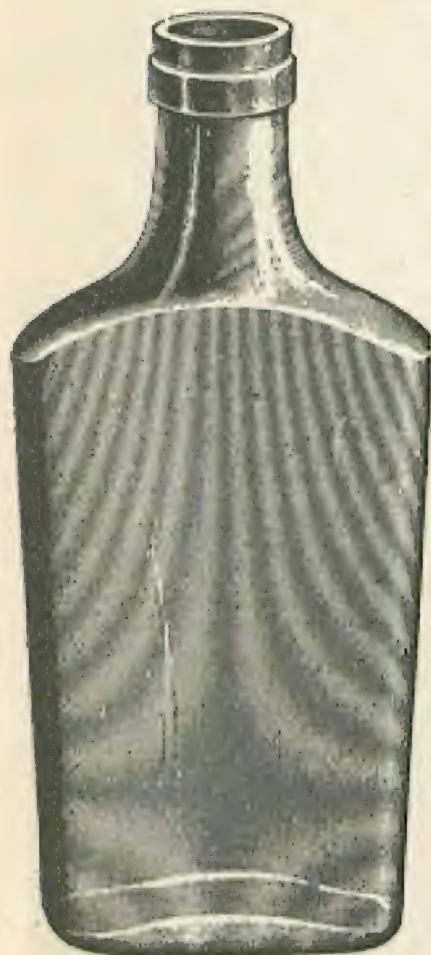

## LIQUOR BOTTLES.

## OLYMPIA FLASK.

Name Copyrighted. Patented Aug. 9th, 1898.

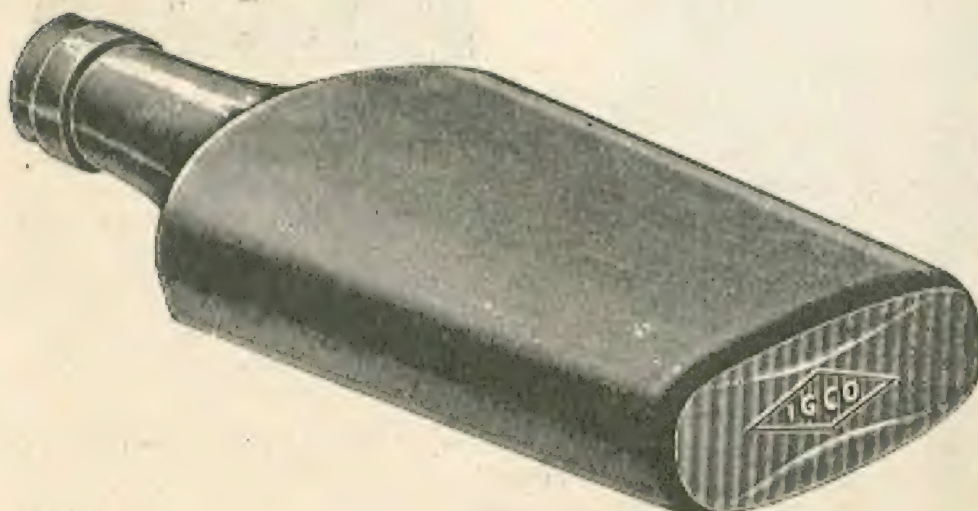

**WE** take pleasure in presenting to the trade our new **Olympia Flask**, in whose shape we have carefully avoided all the objectionable features of ordinary flasks, but preserving their good points and uniting them in a novel design, which, as will be noted by reference to the illustration on this page, is not only pleasing to the eye, but is strong and handy, too.

## SIZES AND LIST PRICES OF OLYMPIA FLASKS.

Hand-Made, Strong and Effective.

Also fitted with Metal Handles, if preferred.

## CASES.

---

**W**E operate in connection with our Glass Factories one of the largest and best equipped Box Factories in the country, and are prepared to furnish *Bottles and Cases complete* where desired.

There are some weighty advantages to bottle users in buying their ware in this manner, a few of which we enumerate :

**BREAKAGE** of bottles reduced to the minimum ;

**FREIGHT** on ordinary bottle packages saved ;

**EXPENSE** of repeated handling avoided ;

**LITTER** of packing straw with attendant fire risk escaped ;

**CHEAPNESS** as compared with other modes of handling.

Our cases, whether *dove-tailed or nailed*, will always be found of clear, sound lumber, strong, neat, and finished in smooth workmanlike manner. The appliances for *printing* cases are of the latest and best approved patterns. Any practicable design can be worked out and reproduced on cases in one or more colors at a trifling first cost for the necessary brass printing plates, which will be furnished by us, if desired, at cost. Some very pleasing and effective designs have been thus produced, samples of which we will be glad to show to those interested.

There are many useful and convenient devices for protecting bottles and contents in their cases for shipment, and while we are not at all disposed to dictate, we cannot at the same time fail to suggest and recommend the Partition Packing made of Corrugated Straw Board. Anyone who is not perfectly satisfied with their present mode of packing will do well to investigate its merits. It adapts itself readily to almost any shape of bottle and is of no less value, when understood, to manufacturers of Proprietary Medicines, Flavoring or Handkerchief Extracts, Chemicals, Pickles, Preserves, Catsups or any article bottled and packed in uniform cases, than to Liquor Dealers who have appeared to better appreciate its advantages.

We are anxious to make your boxes, no matter what shape, size or packing used, especially complete with bottles, and respectfully invite correspondence on the subject. See cuts of a few representative cases on next pages.

Cleated Case.

Dove Tail—Square Corner.

Nailed Case.

Dove Tail—Round Corner.

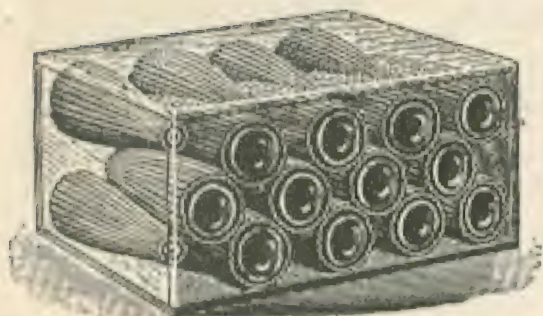

### A TRUE GHOST STORY.

The so-called "Ghost Cuts" on the next two pages are designed to illustrate the various methods of packing bottled goods safely for carriage and storage. The box itself is represented as made of clear glass so as to more effectively show the relationship of all the parts. In some instances, also, the box liners and partitions are represented as transparent, so that the bottle within the wrapper may appear, and its relation to the other parts of the packing be observed and understood.

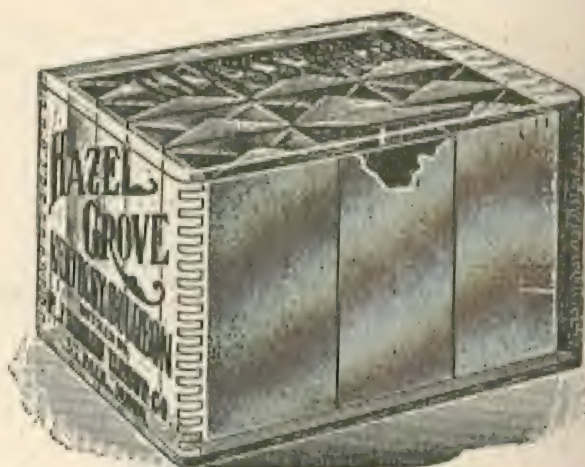

In short, the bottles and packers are represented enclosed in the "Ghost" of a box. We hope these novel cuts may be helpful to our friends in selecting Bottles, Packers and Boxes intelligently.

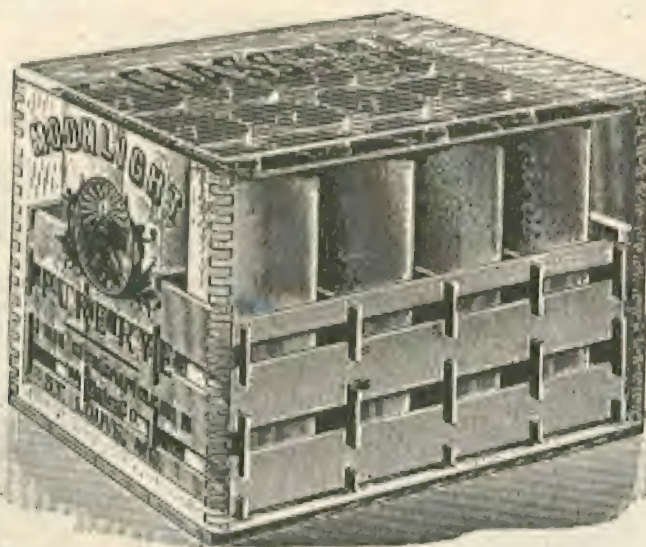

## BOTTLE PACKING.

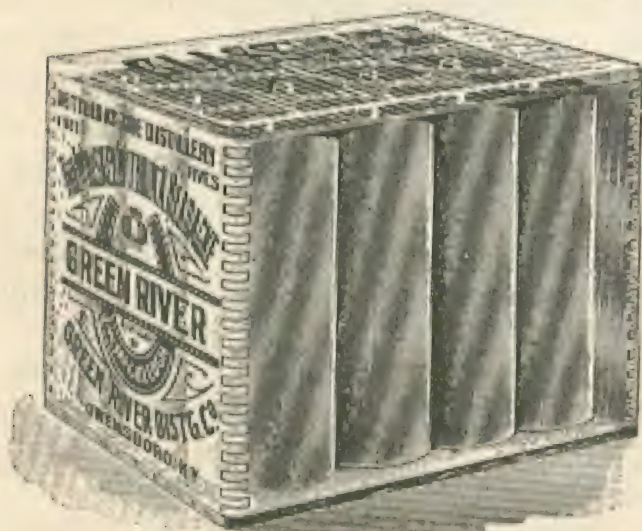

Two Dozen Pints in Climax Wrappers,  
Packed Neck to Neck.

½ Pints, packed in bundles of .....	3000
Pints and Quarts, packed in bundles of .....	2000

## BOTTLE WRAPPERS.

## THE UNPRESSED CLIMAX BOTTLE WRAPPER.

The construction and application of this wrapper is the same as the regular Climax, except that the top is not crimped in or pressed. Its special use is in packing small bottles in large packages like drums, etc.

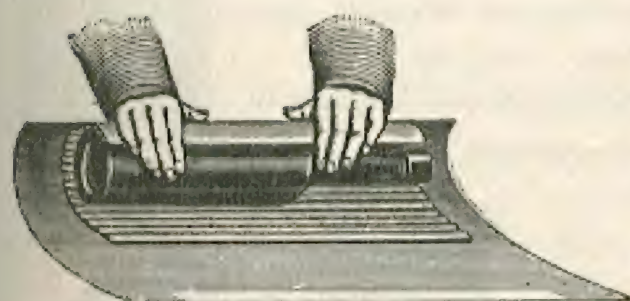

Made to fit any regular bottle of suitable shape and size

Write for prices and other particulars, if interested.

## THE TUBE WRAPPER.

Made of single-faced corrugated paper to fit any suitably shaped bottle. It affords a better protection than the Climax, but costs more of necessity. The application is the same as the Climax, affording an almost absolute protection against breakage in large packages. See Drum, page 181.

Net prices on application.

## THE CHAMPION BOTTLE WRAPPER

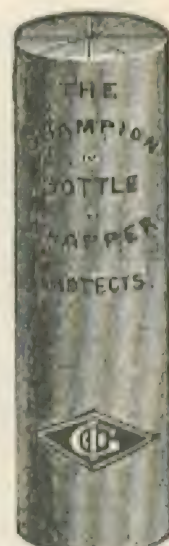

is composed of an inside sheet of single-faced corrugated straw board, equal in length and circumference to the bottle protected, and is pasted fast to the outside manilla paper flap, with gummed edge ready to secure, and of sufficient length to fold at the ends.

No. 31	16-oz.		
No. 32	pint	Hock.	
No. 33	5s		
No. 34	pint	Claret.	
No. 35	5s		

May be ordered by No. per above list, or made specially for any other bottle of adaptable shape.

Net prices on application, plain. Can be printed attractively in one or two colors for a small additional cost per thousand.

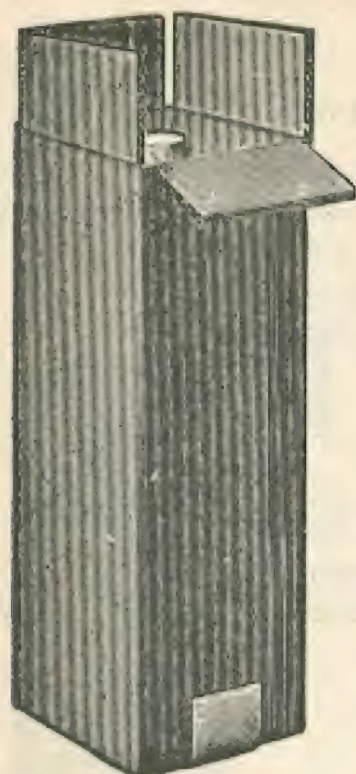

**BOTTLE WRAPPERS.****SLOTTED CARTONS.**

Made of Double-Faced Jute Stock.

This device for the protection of a bottle in carriage is about perfection. We illustrate the carton with one end open to show construction. In operation tapes pasted over the end joints complete a double faced Jute box with ends doubled, affording sure protection against any of the ordinary dangers of travel.

Net prices according to size and quantity.

Write if interested.

**SLIDE CARTONS.**

Made of Double-Faced Jute Stock in Two Pieces, as per Illustration.

These cartons are often used for express shipment of single bottles and afford ample protection. They may be made in three pieces for extra safety if required.

Net prices according to size and quantity.

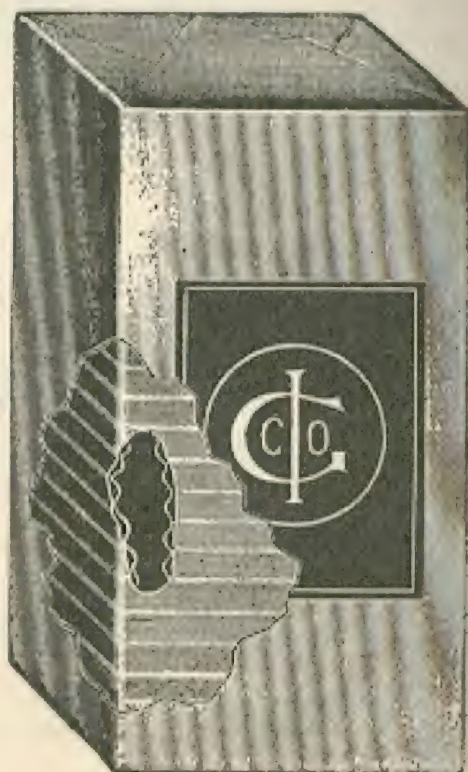

Correspondence Solicited.

**CORRUGATED COMBINATION CARTONS.**

Made of Single-Faced Corrugated Board with double-faced end pieces and covered with Manila Stock, this excellent bottle protector affords ample safety in carriage. Not only so, but it is a sightly package, especially when nicely printed in one or more colors.

Net prices according to size and quantity.

Write if interested, giving exact inside dimensions wanted.

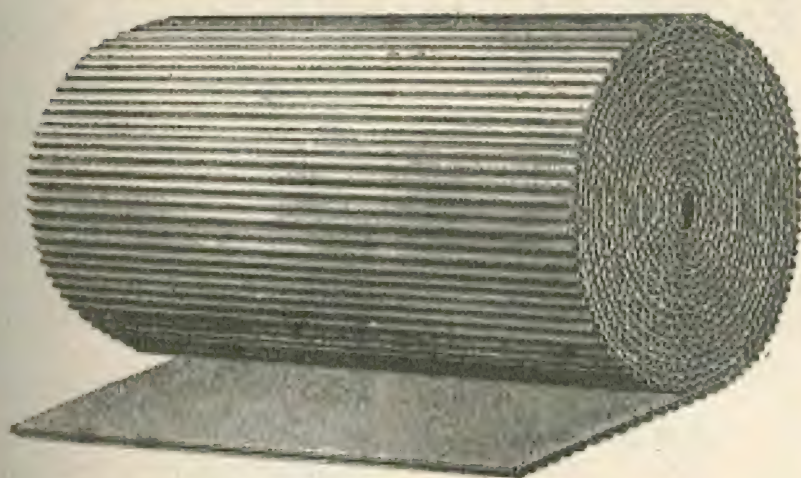

**CORRUGATED PAPER.—Single Faced.**

Regular Stock consists of strips 3 feet wide and 250 feet long in solid Rolls about 2 feet in diameter.

For special uses we also carry single faced board in the following widths:

Single Faced Corrugated Paper.

32 inch, 34½ inch and 36¼ inch, on which we will be glad to quote prices if desired.

We are prepared to furnish Corrugated Paper cut to uniform dimensions by machinery at a small additional cost over the Roll prices.

Correspondence on any

Corrugated Paper proposition invited.

Net prices per roll or per thousand pieces cut to any size.

**PLAIN CORRUGATED PAPER, WITHOUT FACING.**

Strips, 3 feet wide by 500 feet long in solid Rolls.

Cut to dimensions, if desired, same as Single or Double Faced Board.

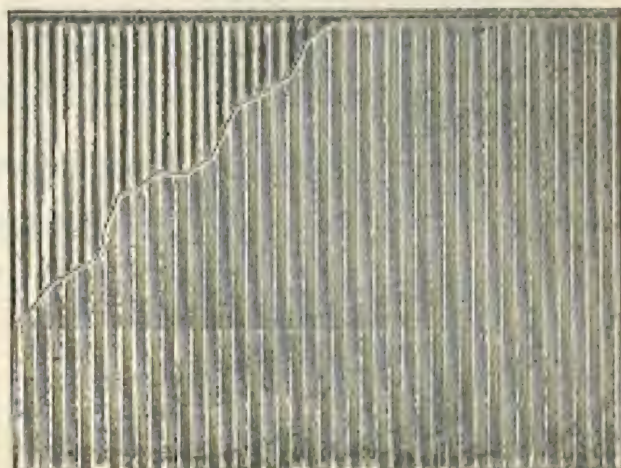

This paper is very adaptable and we urge investigation of its merits.

Net prices on inquiry.

**CORRUGATED PAPER—Double Faced.**

Regular Stock in Bundles of 50 Sheets, 24x36 inches.

This stock is largely used for setting up Partition Packing in Wooden Cases, but is applicable to many other uses. The adaptability of the three varieties of Corrugated Board shown on this page to the protection of bottles particularly and fragile articles generally, is so valuable that it should be better known and understood.

Double Faced Board.

Net Prices on application. Correspondence Invited.

## ILLUSTRATED CATALOGUE.

## PART VIII.

## PICKLE AND PRESERVE WARE.

THIS Department of our manufactures covers considerable ground. In arranging the same we have endeavored to collect under this head all those bottles and jars which are used distinctively for *food products*.

Every care has been taken to secure shapes and sizes suited to every need, evidence of which may be observed in the five shapes of English Chow Bottles differing so slightly one from another as not to be noticeable except to the close observer. We might also direct special attention to our line of Olive Bottles on pages Nos. 195 to 199.

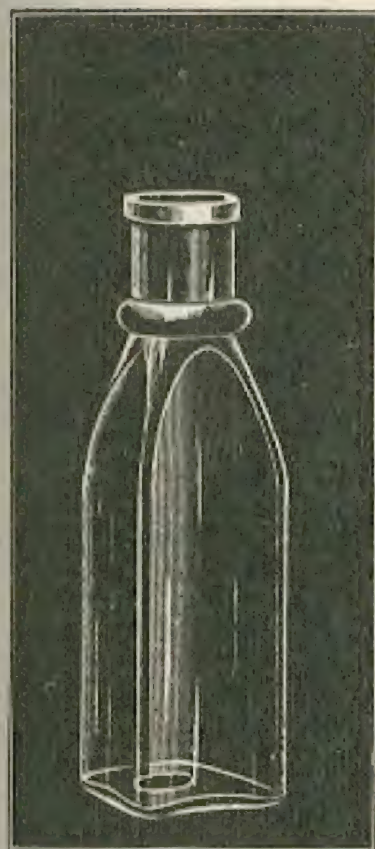

Uniformity of finish on wide mouthed ware is one of the many details on this class of ware in which it is our effort to excel.

We therefore commend these pages of our Catalogue to all *Bottlers of Food Products* in the earnest hope that its pages may prove both interesting and useful.

Attention is directed to new shapes all through this department.

## ILLUSTRATED CATALOGUE.

## PART IX.

This department of our Catalogue comprises all of those bottles which are used by Bottlers of Soda Water, Lager Beer, Weiss Beer, Mineral Waters, Ale, Porter and Cases for same.

We have given great attention to this particular branch of our business, and can assure our patrons that in the variety of shapes, toughness of glass, excellency of workmanship and careful attention to the finish and selection of ware, we have spared neither expense nor care.

The extent of our business in this particular direction, taken in conjunction with its annual increase, we are only able to explain on the ground that the trade recognizes our product as superior.

We would direct special attention to our line of Cases, beginning page 263.

Siphon. Style A Head.

Above prices include the cost of stamping heads and etching bottles with firm name, in lots of 100. Where elaborate designs are required, a small additional cost will attach, depending on the nature of the work.

## STYLES OF HEADS.

We recognize the preference of each bottler in the selection of the style of Head for his Siphons, and have made arrangements to furnish any kind of head desired.

The head shown on above cut is regarded by many as the best in use. In ordering, state *size* of bottles wanted and specify *head* by letter as illustrated on following pages.

## SIPHONS.

These Bottles represent the acme of the glass blowers' art. Every step in the progress of their manufacture, from the selection of materials to the packing of the finished product has been jealously guarded. The result is a Siphon good to look upon in its symmetry and beauty, and as strong as steel.

Our Siphons are guaranteed to stand a pressure of 200 pounds (Standard Gauge), upon the first filling. After this proof of strength our responsibility ceases.

## SIZES AND PRICES.

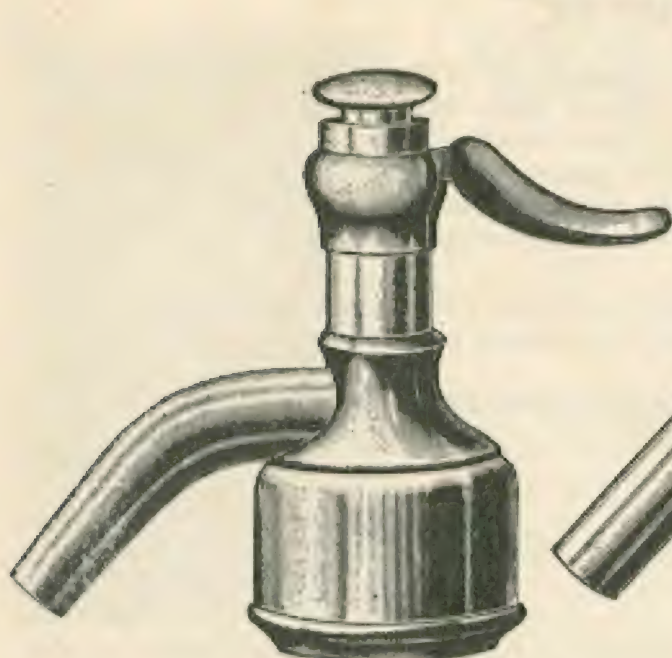

18 oz.	capacity Siphons, complete,	70 cents each.
28 "	" " " " "	75 " "
37 "	" " " " "	80 " "
44 "	" " " " "	85 " "

In lots of 500 or over a small discount can be given from above prices.

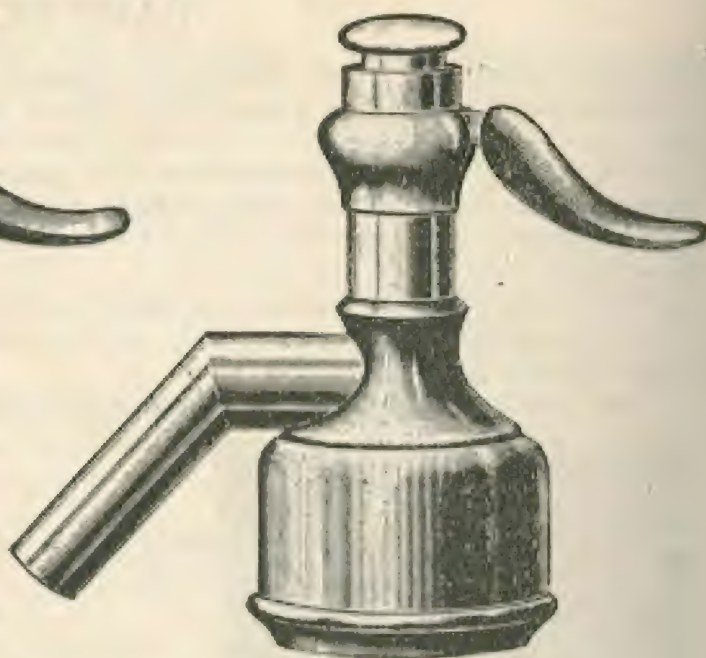

The 28 oz. size is carried in stock in BLUE Glass. Net prices only in Blue on application.

## SIPHONS.

STYLE A.

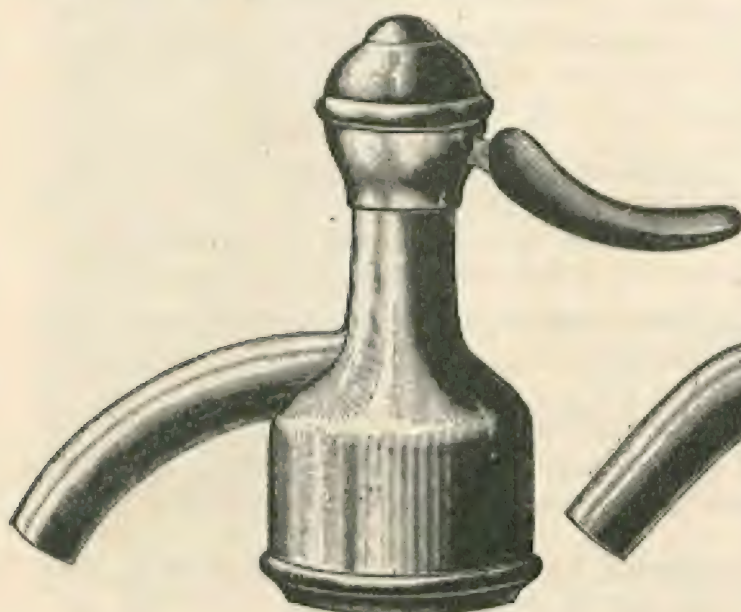

STYLE B.

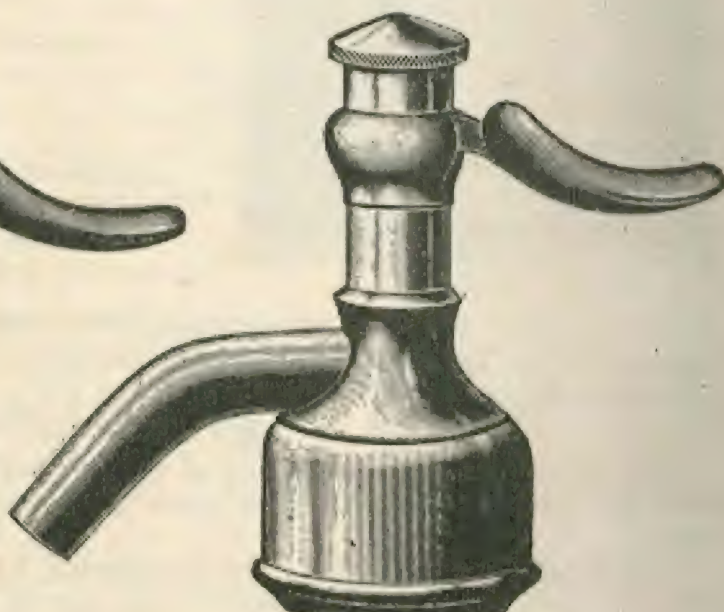

Note six styles of **Siphon Heads** illustrated on this and the next page. They all have their strong points and are all first-class, both in design and workmanship.

In ordering, please use the letters A, B, C, D, E or F to designate style wanted, as shown on these pages, thus avoiding misunderstandings.

On the second page following will be found prices on Siphon Heads only, and all parts thereof.

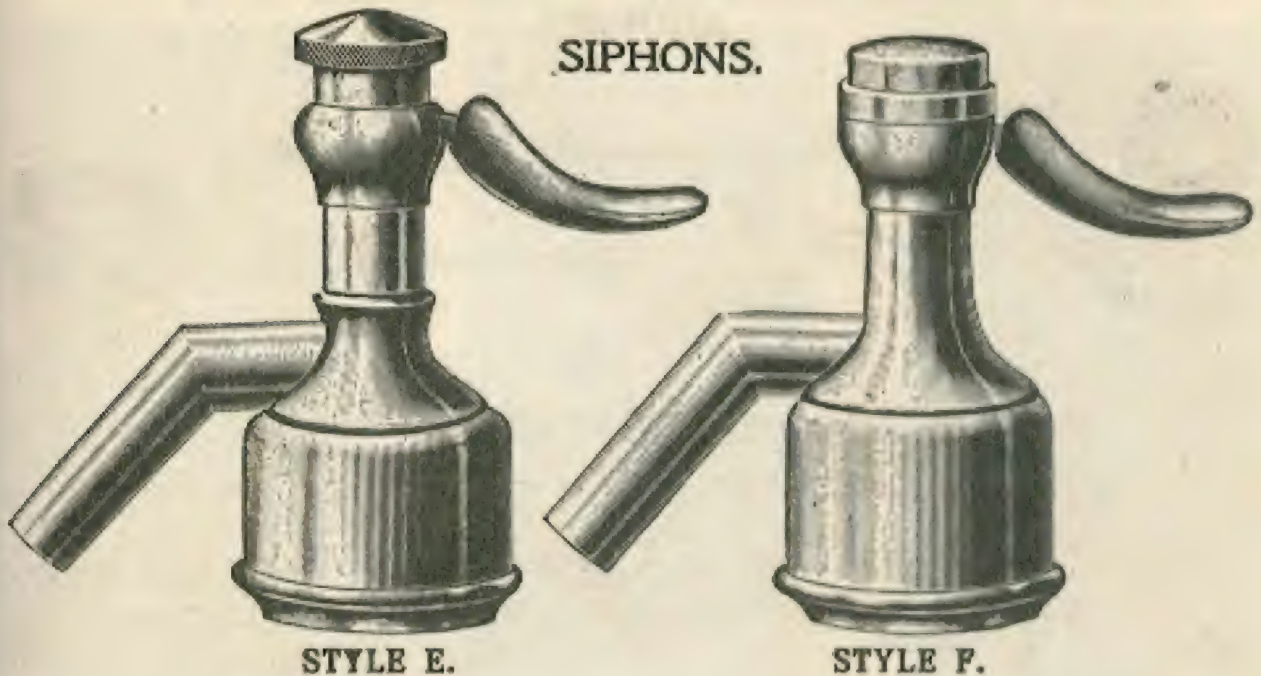

STYLE C.

STYLE D.

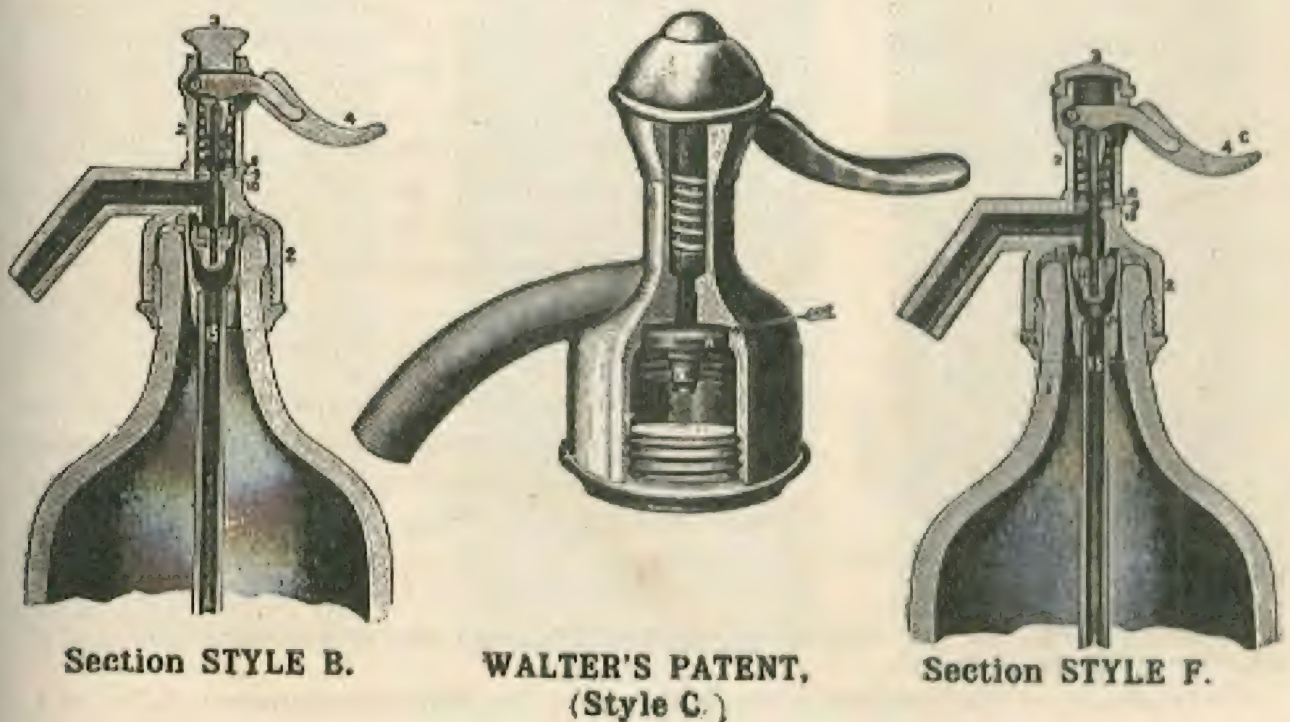

## SIPHONS.

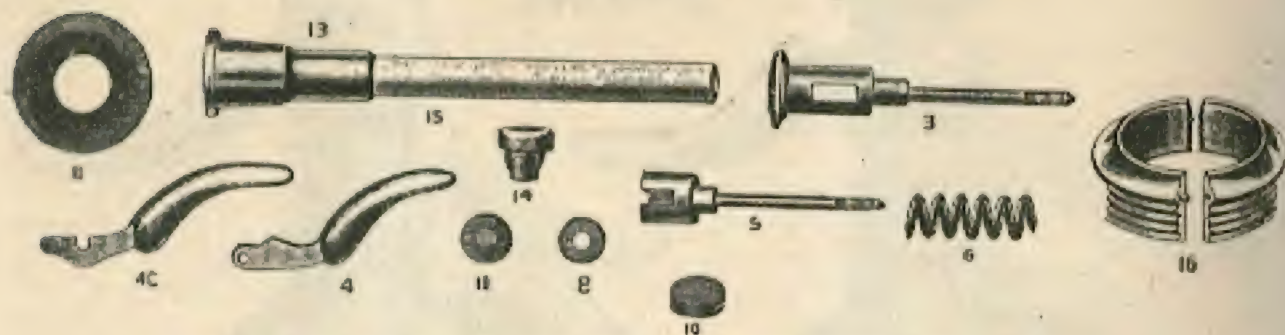

All our Siphon Heads are made of Pure 'Block Tin, properly hardened. All inside working parts are carefully selected and plated.

The sectional cuts below are designed to give one a correct idea of the interior construction of three representative Heads. The advantage of the Siphon Head, Style C, Walter's Patent, is that by its construction the breakage of Siphon necks and tubes is altogether prevented. Note cut showing rubber cushion "A," which rests upon the metal part of tube. Additional advantages consist in the facts that filling is rapid and discharge uniform, while repairs are made easy, there being no pins to remove. The caps unscrew and the lever can then be unhooked, exposing the working parts. These Heads are made in four different styles, C, D, E and F.

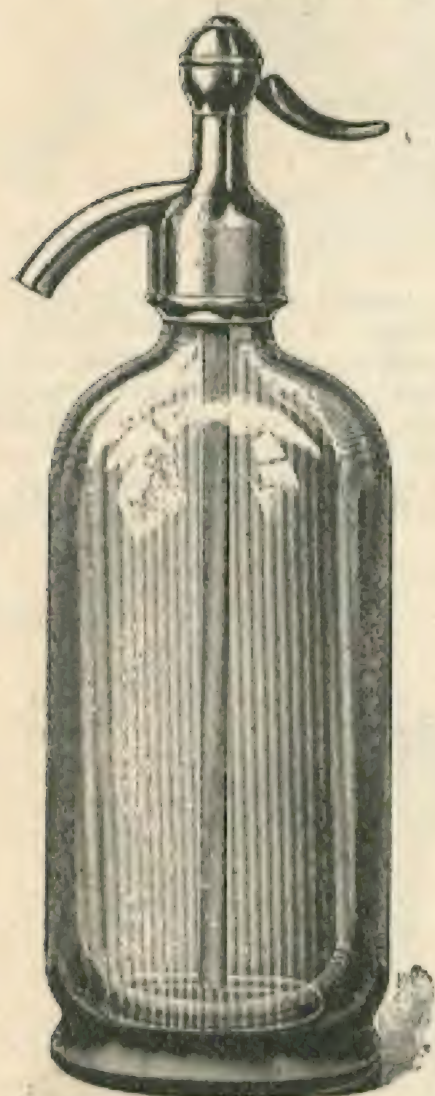

## SIPHONS.

## PRICE LIST OF SIPHON HEADS AND WORKING PARTS

by numbers as shown above, and also on page 235 sectional cuts.

Siphon Complete with Walter's Patent Head, Style C.

Siphon head, with collar, tube, etc., each		\$0.30

Siphon Bottles, as well as the various styles of heads and working parts of same, are kept on hand at all times in quantity, so that the largest and most exacting orders may receive prompt and intelligent care.

Skillful etchers in our employ are prepared to work out any design artistically, whether plain or elaborate.

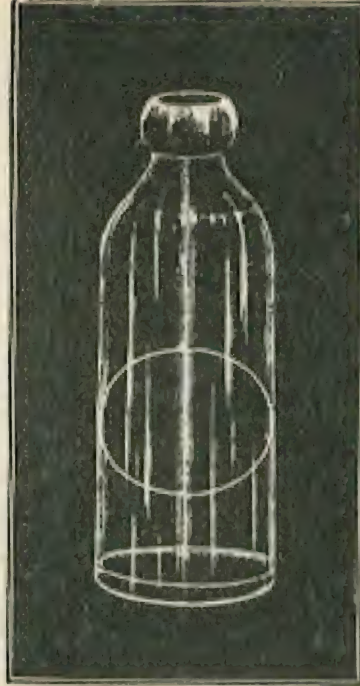

Correspondence on Siphons or anything pertaining thereto is respectfully invited.

## SPRING STOPPERS.

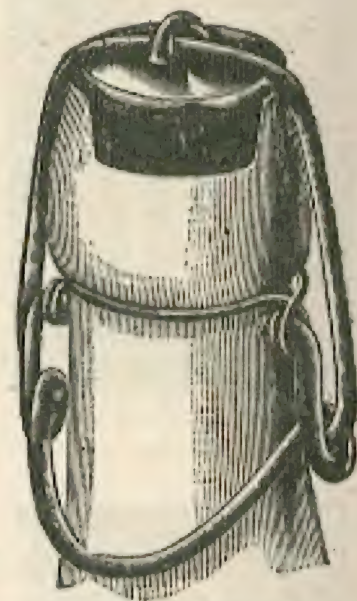

In order to be able to insure our customers the very best Spring Stoppers obtainable we have had made for us a *Special Guaranteed Grade*. These Stoppers have our initials stamped into them as per cut herewith.

Unless otherwise instructed we fill all orders with these stoppers. They can be relied upon, as they are honestly made of the best materials. They have a *Double Guarantee*—our own and the manufacturer's. We know they will give satisfaction in use, and ask no more for them from our customers than they would pay for ordinary grades.

We can also furnish the celebrated

### PUTNAM'S LIGHTNING STOPPER.

which we offer to the trade either attached to bottles or in bulk. Bottlers can avoid vexatious delay and embarrassment in buying these stoppers attached to bottles, thus securing the exact size needed. Stoppers will be attached by experts who thoroughly understand just what is required.

Lightning Stopper.

Hutter Stopper.

### THE HUTTER PORCELAIN STOPPER.

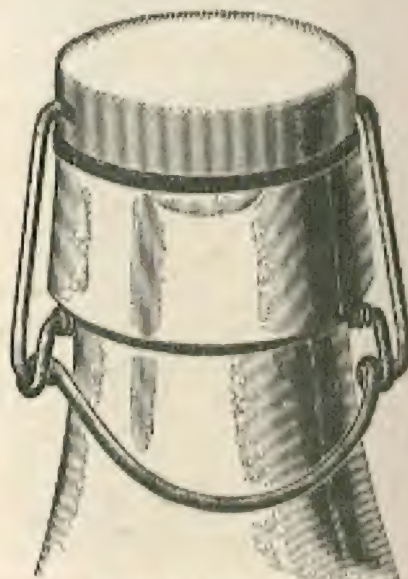

This elegant and effective stopper is now within the reach of any in price who require such goods.

We are prepared to furnish plain stoppers attached. Lettered Stoppers can be secured by placing orders three months in advance of needs.

Write for prices if interested.

### SPECIAL PORCELAIN STOPPERS.

We are in position to furnish *Extra Sized and Specially Designed Stoppers* for 5-gallon Kammerer Crate Rocker Lid Demijohns and other large containers. See cut herewith. Heretofore these stoppers have not been obtainable except at exorbitant figures. We are now offering an efficient and handsome stopper at reasonable cost, either plain or lettered, and invite correspondence with those who may be interested.

Special Porcelain.

## BOXES FOR BOTTLERS' USE.

We can furnish CITY BOXES OR SHIPPING BOXES at short notice and in any quantity.

Our BOX FACTORY is equipped with latest improved wood-working machinery, and supplied with an ample stock of well seasoned timber. We guarantee the best possible service in furnishing HANDSOME, SERVICEABLE and HANDY BOXES for BOTTLERS' USE.

Parties buying their bottles of us will save money by placing their orders for *bottles and cases together.*

Some of the advantages gained are these :

Your bottles when received are in boxes of the *exact size and kind wanted.*

*Breakage* of bottles in shipment is almost entirely avoided.

A great saving in *freight charges* is effected, especially in shipments of less than car load lots, because bottles packed in cases are shipped at a lower classification than empty cases.

Bottles thus shipped are received free from *chaff and straw.*

Shippers' count can be verified at a glance, and controversy as to number of bottles received avoided.

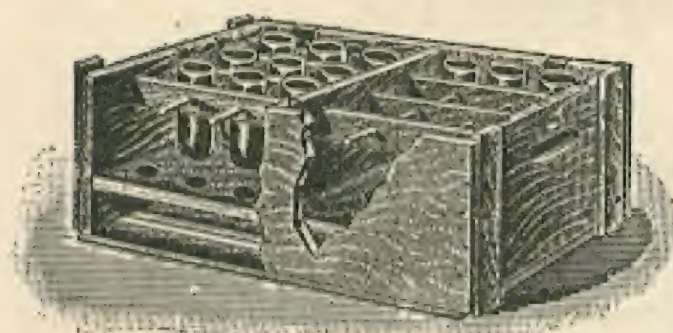

In a word, buy *Bottles and Boxes* of us and save *time, trouble and cash.*

Buyers will find it to their advantage to secure our figures before placing their season's contracts. We are prepared to do some close figuring on large contracts.

If you need BOXES for BOTTLERS' USE, let us know it. We want your orders, and will try to merit them.

## No. 1 PATENT CITY BOX, WITH SAFETY RACK.

No. 1 Style.

This cut shows the No. 1 Case arranged for 2 dozen  $\frac{1}{2}$  pint Sodas, weight,  $7\frac{1}{2}$  pounds.

4 " $\frac{1}{2}$ Pints.....				90 cents.
6 " $\frac{1}{2}$ Pints.....				\$1 50
2 " Pints.....	56 cents.	62 cents.		
3 " Pints.....			69 cents.	
4 " Pints.....			\$1 00	
1 " Quarts.....		52 cents.		
2 " Quarts.....		85 cents.		

The upper cut shows the style and make up of the No. 9 case when adapted to  $\frac{1}{2}$  Pint and Pint Bottles, 4 and 6 dozen capacity. The lower cut shows the proportions when built for 1 and 2 dozen Pints and Quarts.

The above prices are figured on Sound Dry Cotton Wood boxes with Gum Ends, a construction that will outlast pine boxes 2 to 1.

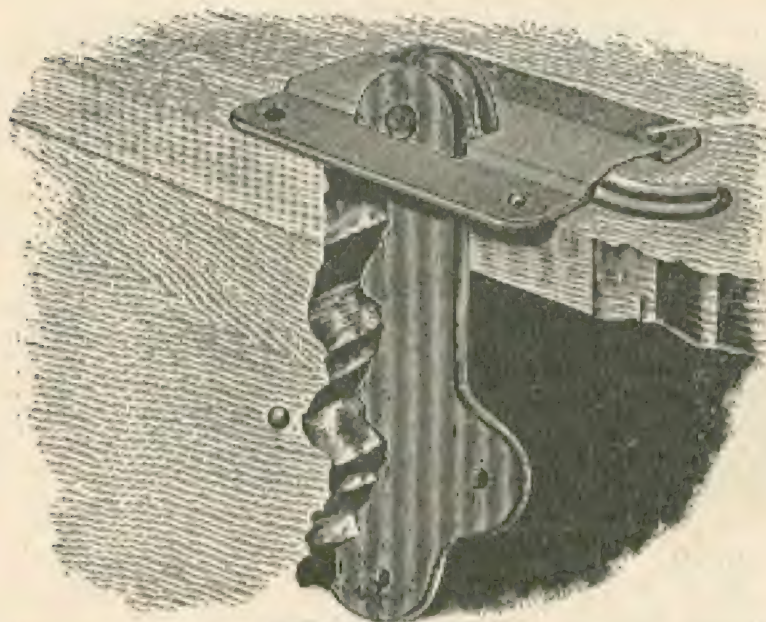

If a cheaper box is required we can make them, but recommend the above as more truly economical.

No. 9 Style, Deep.

## BOX LOCKS.

THE LEO LOCK.

On this and the following page we illustrate five of our best Box Locks. They differ materially from each other, but all have their points of excellence which will readily appear from an examination of the cuts. Most of them are familiar and well tried Locks. We have purchased the Patents on all these Locks and are prepared to furnish BOX MANUFACTURERS with them at the very lowest prices consistent with excellence of material and workmanship. Being thor-

oughly protected by the United States Patent Office, care should be used in purchasing from unauthorized sources. Correspondence solicited.

## THE LEO LOCK.

Pat. Oct. 6, 1896.

Strong, simple, compact and secure. It locks itself and is easily unlocked without injury to the fingers or delay. Seal and wire readily attached.

Price, 4 cents each, net.

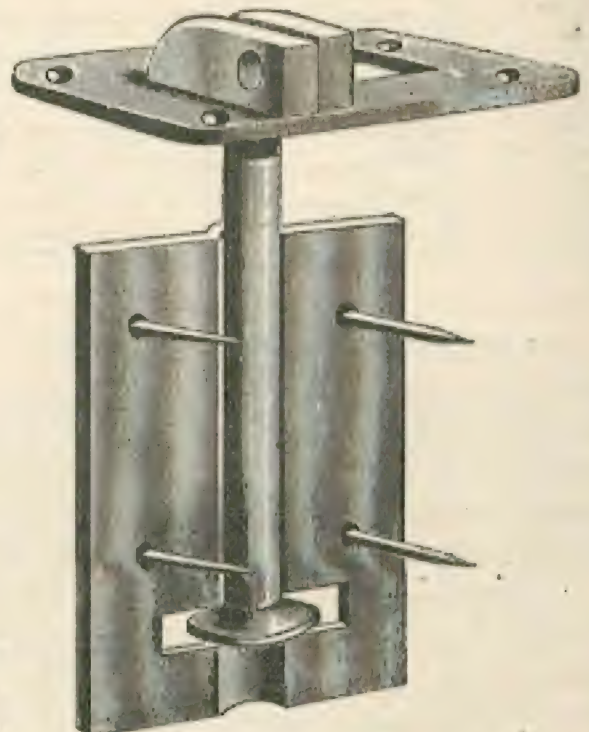

## THE BEEHLER BOX FASTENER.

Pat. April 19, 1887.

This Fastener is so well known that it is only necessary to say that WE HAVE ACQUIRED THE SOLE RIGHT TO MANUFACTURE AND SELL THEM.

Price, 4 cents each, net.

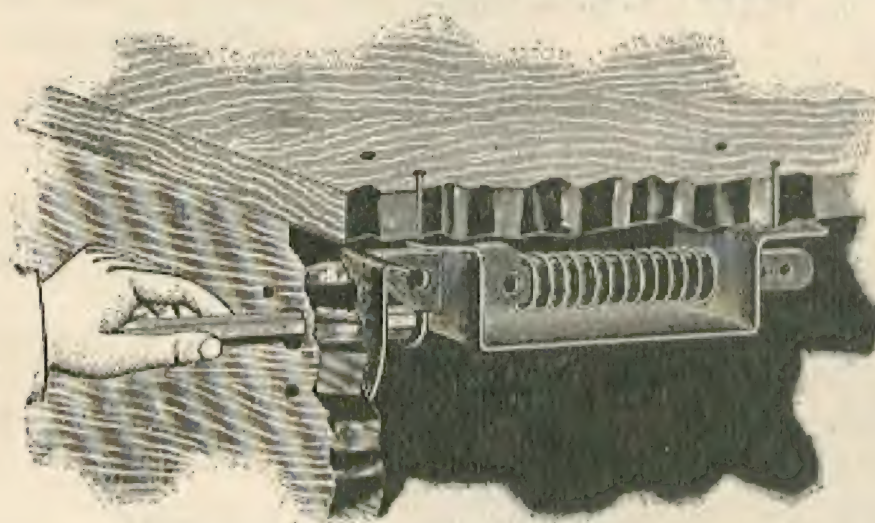

Patented April 19, 1887  
BEEHLER LOCK.

## BOX LOCKS.

### THE SECURITY LOCK.

THE SECURITY LOCK. Patent Applied For.

tal bar which forms the catch); also in case of breaking or weakening of spring the catch can be easily removed and spring replaced. The application of seal and wire is simple and effective; wire is passed through the opening-hole in front of box, through the hole in catch and out over the edge of box, and is sealed at the opening-hole out of harm's way in piling. These advantages, with its reasonable price, will commend it to those who appreciate a good thing in SPRING LOCKS.

Price ..... 5 Cents Each, Net.

### THE ACME LOCK.

Patented March 11th, 1890.

Simple, strong and easily applied. Many prefer this lock to any other on account of the small outside space taken by it, its simple and effective action and its low price.

Price..... 4 Cents Each, Net.

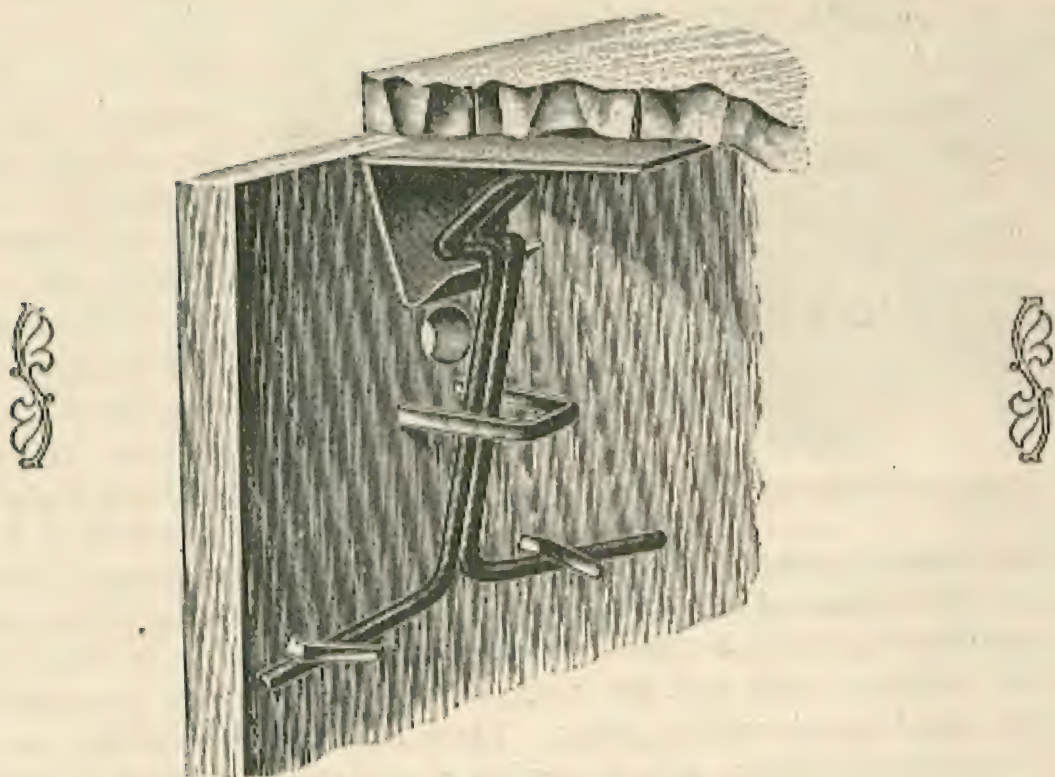

THE ACME LOCK.  
Pat. March 11, 1890.

## THE "LEVIS" BOX LOCK.

PATENT APPLIED FOR.

## THE "LEVIS" LOCK.

Patent applied for.

This new **Inside Lock** will recommend itself to Box users because it is strictly all inside. It is also self-locking, simple, easily applied and effective in operation.

The engraving herewith shows the application of the two parts of the lock to the side and top pieces of a box with parts cut away to better show the attachment. The illustration shows the lock closed. To open, a pencil or nail pushed through the key-hole against the spring is sufficient. A paper seal pasted over the key-hole is the usual method of sealing, though the lead seal and wire can be applied if preferred.

Our agents will show samples, or we can send them direct if desired.

---

Price..... 4 Cents Each, Net.

The cut in margin of this page will give an idea of the

### PATENT TWISTED WIRE STRAP

for boxes, which is far superior to the old style Band Iron. More economical, more easily applied, more serviceable.

Cut in lengths as required, at 60 cents per 100 feet. In coils of 3,000 to 5,000 feet, special prices furnished on inquiry.

### BOX TRIMMINGS.

In addition to Box Locks previously shown, we carry in stock a supply of the following Standard Box Trimmings which are specially designed for the purpose. They are strong, well made and properly countersunk for box use. We will be glad to furnish same in large or small quantities as needed—see Cuts below.

### PLAIN STRAP HINGES.

4 inch	50c. per dozen pairs.
3 " "	40c. " "

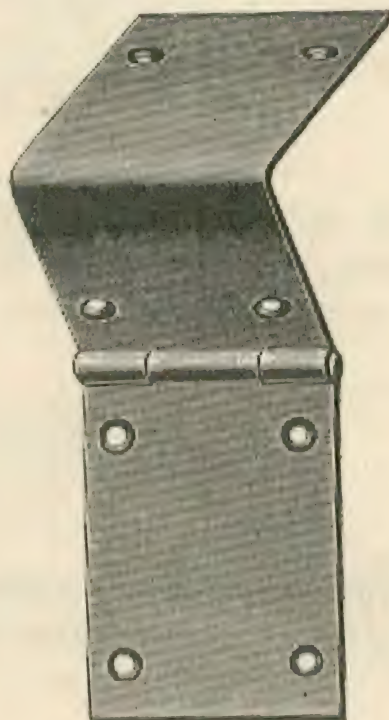

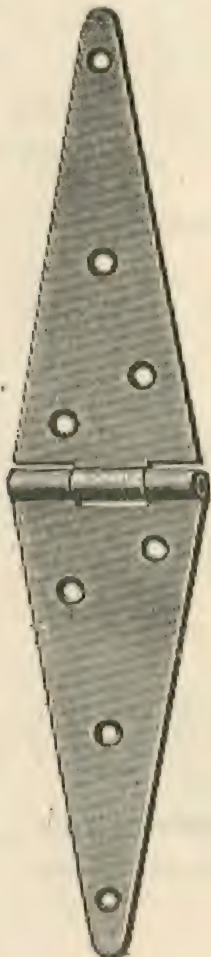

### SPECIAL BENT HINGES.

2 1/4 inch bent for 5/8 or 3/4 stuff	50c. per dozen pairs.
--------------------------------------	-----------------------

### HASP AND STAPLES.

3 inch	50c. per dozen pairs, plain.
3 " "	90c. " " with catch.

Discount on Jobbing Orders.

## SEAL PRESSES, SEALS AND WIRES.

SEAL PRESS.

The cut above shows our new perfected Seal Press, for use in connection with the lead seals and wires shown below, for the better protection of bottle cases in transit or storage. Seal presses can be furnished either plain or with engraved dies which will produce an initial, monogram or other small distinctive design, as desired. No additional cost for engraved dies.

## PRICE LIST.

Seal Press, 10 $\frac{3}{4}$  inches long, plain or engraved.....\$3 25 each.

No. 5 Lead Seals, perforated for wires.....\$2 75 per 1,000.

No. 5 Seals are  $\frac{3}{4}$  inch diameter, and run 27 lbs. to 1,000.

Double Twisted Wires, cut into 10-inch lengths.....75c per 1,000.

The cut below shows wire and seal together after passing through press. This device in actual practice has proven one of the most effectual safe-guards in the shipment and storage of bottled goods ever devised.

Trade discount on jobbing orders.

## GRADUATED APPARATUS.

The standard used by us in graduating Flasks, Jars, Burettes and Pipettes, is the Liter of the International Bureau of Weights and Measures; that is, the volume occupied by 1000 grams of water when weighed at the temperature of its maximum density in vacuo.

The instruments are standard at 15C, unless otherwise stated, and the reading is taken at the bottom of the meniscus. The graduation is done with the aid of apparatus especially devised and controlled by ourselves, and by methods which insure freedom from error, so that we are able to guarantee the highest degree of accuracy.

## BURETTES.

Our Burettes are so graduated that after drawing out the required quantity as rapidly as possible, two minutes must be allowed for draining before final reading is taken.

## No. 900. Burettes with Faucet Stop-Cocks.

As delivery is made through the bottom of the stopper, the burette can be operated with either hand.

50 c. c. divided  $\frac{1}{10}$  each, \$4.00      100 c. c. divided  $\frac{1}{10}$  each, \$5.75
